IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of

Yuuji NAKAHARA et al.

Appln. No.:

Group Art Unit:

Filed: December 13, 2000

Examiner:

For: STATOR FO DYNAMO-ELECTRIC MACHINE

**INFORMATION DISCLOSURE STATEMENT**  
**UNDER 37 CFR §§ 1.97 and 1.98**

Assistant Commissioner of Patents  
Washington, D.C. 20231

Sir:

Pursuant to Applicants' duty of voluntary disclosure under Rule 56, and for the Examiner's convenience, we submit herewith:

- a) a form PTO-1449 listing three (3) references of potential relevancy; and,
- b) a complete copy of each reference.

No certification or fee is required.

Regarding the concise explanation of relevancy requirement for foreign language documents, a brief English language summary is also attached.

Respectfully submitted,

Robert J. Seas, Jr.

Registration No. 21,092

No F0045

Information Disclosure Statement

Patent No.: Japanese Patent Publication P 8- 019196

Title of the Invention : Rotary motor and production method thereof, and laminated core and production method thereof.

A rectangular parallelepiped-shaped laminated body , each having a plurality of teeth , and after inserting coils , the body is annularly bent.

Patent No.: Japanese Patent Publication P 9- 103052

Title of the Invention : Production Method of stator for rotary-electric machine.

A rectangular parallelepiped-shaped laminated body , each having a plurality of teeth , and after inserting coils , the body is annularly bent.

Patent No.: USP 5859486

Title of the Invention : Rotary motor and production method thereof, and laminated core and production method thereof.

The invention discloses to provide a low cost , high performance , thin structure rotary motor for driving medium used in magnetic disk drive unit or the like .
